

## Light: Observing the Sun, Moon, and Stars Check for Understanding

Circle the word that makes the sentence true.

1. The Sun \_\_\_\_\_ light.

creates      reflects

2. The moon \_\_\_\_\_ light.

creates      reflects

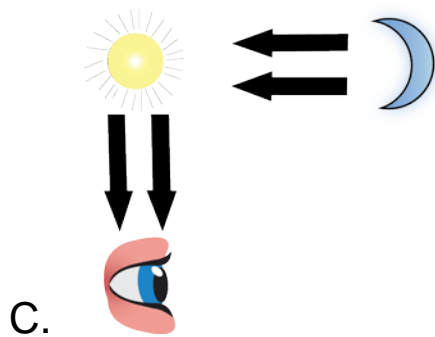

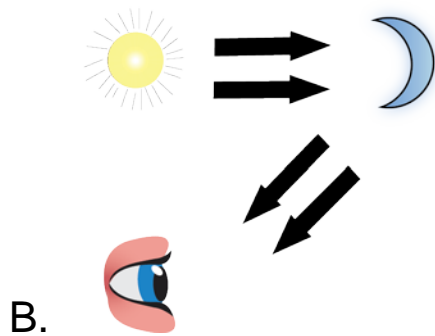

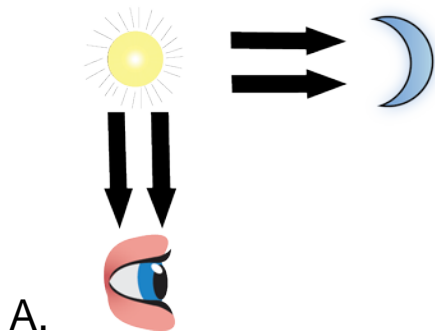

3. Our eyes see sunlight \_\_\_\_\_ it travels through space.

before      after

4. We \_\_\_\_\_ see stars during the day because the Sun shines so brightly.

can      cannot

5. Circle the picture that best shows how the light from the Sun reflects to help us see the moon.

6. This is what Anthony observed as the Sun rose, moved across the sky, and then set.

He drew a picture of his observation on Monday and Tuesday. Draw what you expect he will see as he watches the Sun on Wednesday.

Day	Pattern of Sun rising
Monday	
Tuesday	
Wednesday
